

Forest Encounter - Vines

!1 – Hill - There is a steep hill with 10ft separating the lower area with dry shrubs and the high plateau covered in vines. It is mostly vertical, but provides easy footholds and there are also vines to climb. A DC10 athletics check is enough to climb it.

!2 – Slope - A gentle slope leads up on the plateau. It is easy enough walk it, no need for any checks.

!3 – Vines - The plateau is covered in vines and tall shrubbery. The shrubs provide visual cover, they are 5ft tall.

!4 – Dry Shrubbbery - They don't provide much cover, but are thick and covered in thorns. They are difficult terrain for medium or smaller creatures.

!5 – Dead tree stumps - 4ft tall and 1.5ft wide. They can provide cover or a hiding spot for small creatures.
