

## Road Encounter - Bridge

**!1 – Brook:** A 4ft deep brook with a gentle current.

**!2 – Wooden bridge:** A simple bridge built with wooden boards and logs. It is sturdy enough to bear the weight of a fully loaded heavy wagon.

**!3 - Rock:** In the middle of the brook there a pointy rock roughly 4ft wide. An athletics check with DC13 is enough to hop on the rock and jump to the other side .

**!4 – Large Rock:** A large rock, 7ft tall and 12ft wide. Can be used as cover or climbed on, giving advantage on melee attack rolls against others trying to climb it.

**!5 – Rock:** A 5ft tall rock. Can be used as cover or hiding.

The trees are roughly 30ft tall. They can be climbed with a DC15 athletics check. They can be used as cover. They are 1.5ft wide at the base, so only small characters may attempt to hide behind them.
